

THIS SATURDAY ONLY

FREE PET BLOOD SCREENING

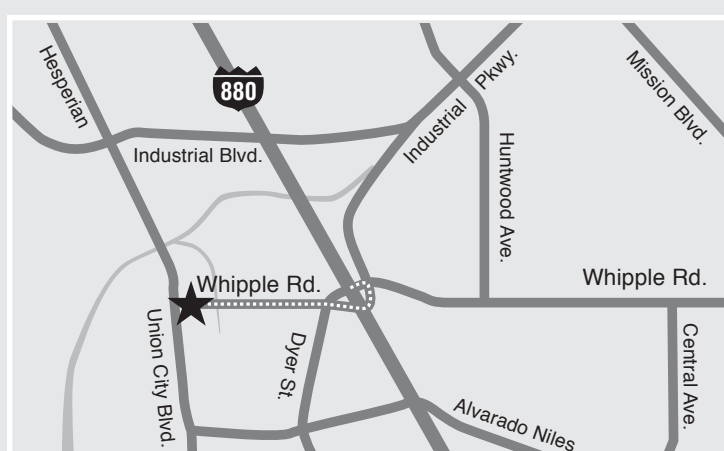

In light of the recent news about tainted pet food, Abaxis is reaching out to help local pet owners whose pets may have been affected or whose owners may be concerned. We are particularly concerned about the lower income families in this area that might not be able to afford routine or preventative care. In an effort to do our part, Abaxis is hosting a FREE blood

testing* event this Saturday for dogs and cats to help out local pet owners who have not sought out veterinary services. Join us this Saturday, March 31 between 10 am and 3 pm for FREE hot dogs and hamburgers and have your pet tested by licensed veterinary technicians. Your results will be available to you within minutes. For more information call 800-822-2947 x 6585.

Abaxis develops, manufactures and makes portable blood analysis systems for use in any veterinary or human patient care setting to provide clinicians with rapid blood constituent measurements. The system consists of a compact, portable analyzer and a series of single use plastic discs, called reagent rotors, that contain all the reagents required to perform 23 different assays and 8 different profiles.

SATURDAY, MARCH 31
10 AM TO 3 PM

3240 WHIPPLE ROAD
UNION CITY

DIRECTIONS FROM 880 SOUTH: Take the Whipple/Dyer Street Exit. Merge onto Whipple. Make a left on Kohoutek. Abaxis is in the back of the business park.

DIRECTIONS FROM 880 NORTH: Take the Whipple Exit. Make a left at the light. Go under the freeway and make a right onto Whipple. Make a left on Kohoutek. Abaxis is in the back of the business park.

*Just as in human medicine, best results for lab work will be realized if you do not feed your pet the morning of testing. Water only please.
