DIAGNOSTIC INSTRUMENTS

FOR ANIMALS. FOR HEALTH. FOR YOU.
Whether in the hospital, barn-side, research lab, or out in the wild, VETSCAN® products deliver the perfect blend of dependable performance, simplicity, and accuracy, with cost-efficiency in mind. With over 20 years of proven innovation, VETSCAN products offer a comprehensive diagnostic menu including chemistries, electrolytes, immunoassays, and blood gas in single-use cartridges and reagent rotors; fully-automated five-part differentials with cellular histograms; single-use rapid tests for infectious diseases; semi-quantitative and qualitative urine chemistries; high-resolution urine sediment, and more. VETSCAN products stand on their promise to provide veterinary professionals with the products and services they need for an optimal laboratory experience and consistent quality care for their patients.

CARYSTA™ reimagines veterinary diagnostics based on the inherent needs of veterinarians and technicians, and the changing environment they work in. Providing new test selection and prioritization flexibility, CARYSTA enables a comprehensive range of diagnostics tests to be performed quickly and cost-effectively, in-house, with reference lab technology. By streamlining workflow and helping to free up resources, CARYSTA allows veterinarians to spend more time on what matters the most – their patients.

The i-STAT® Alinity system integrates patient testing directly into the patient-care pathway, accelerating time to treatment, improving quality and increasing access to care. By making patient-side testing easy for everyone, the i-STAT Alinity system drives a new approach to shaping patient care in a broad range of clinical settings.

CHEMISTRY + HEMATOLOGY
VETSCAN VS2
Chemistry Analyzer
Rocket Science at the Point-of-Care with 13 Profiles to Choose From

The VS2 is a state-of-the-art chemistry, electrolyte, immunoassay, and acid-base analyzer that delivers uncompromising accuracy from just two drops of whole blood, serum, or plasma. The VS2 is amazingly simple and intuitive, with reference laboratory quality results in 12 minutes—making it ideal for veterinary clinics, mobile practitioners, research laboratories, and pharmaceutical and biotech companies.

For VS2 Only
intelligent Quality Control... or as We Like to Call it, iQC

With the VS2 Chemistry Analyzer, quality control is built-in—thanks to a sophisticated iQC system that combines with proprietary algorithms to ensure quality and dependability with every result. No more worrying about running controls and calibrations.

Save Time & Money
iQC eliminates labor and material costs of other analyzer controls and calibrations. Having iQC is like having a service and maintenance agreement at your fingertips, at no additional cost.

Rocket Science Delivered Right to Your Lab
iQC protects you and your patients by automatically ensuring your VS2 is working properly and providing accurate results... on every run.

iQC Reactions
Chemistry QC reagent beads identify the degradation of the analyte-specific reagents in the rotor due to suboptimal storage conditions. If degradation exceeds a defined level, the run is canceled or suppressed.

Simple Operation
Veterinary facilities around the world have discovered how the VS2 Chemistry Analyzer has improved work flow and saved them time and money. Three simple steps deliver results on-site, in minutes.

1  Insert sample.
2  Insert rotor.
3  Read results.

CARYSTA HVC
High Volume Chemistry Analyzer
Any Test, Any Combination, Any Time - It’s Your Choice

CARYSTA HVC is a high-volume chemistry instrument that enables veterinarians to run a wide range of in-house diagnostics with greater flexibility and efficiency. Bringing reference laboratory technology to the veterinary clinic, CARYSTA HVC delivers results you can rely on.
Flexible and Comprehensive Test Menu — Select from a Combination of 41 Available Parameters

- Alanine Aminotransferase
- Albumin
- Alkaline Phosphatase
- Aspartate Aminotransferase
- Bicarbonate
- Direct Bilirubin
- Total Bilirubin
- Blood Urea Nitrogen
- Calcium
- Chloride
- Cholesterol
- Creatine Kinase

- Sodium/Potassium
Innovative Flexibility for Enhanced Patient Care

Accuracy
Reference laboratory technology brought to your veterinary clinic, for results you can rely on.
- Liquid reagent technology performs to the standard of the reference lab
- Minimization of interfering substances and extended linearity for reliable results the first time
- Accuracy and precision verified for every available analyte

Flexibility
The freedom to perform the tests you need, when you need them.
- Flexible panels and customized test selection
- Vast menu provides greater in-clinic capabilities
- Emergency interrupt capability to prioritize urgent samples

Efficiency
Streamline practice workflow and minimize operator involvement.
- On-board reagent stability, auto dilution, and rerun capability reduces technician workload
- Multiple sample positions minimizes reloading and decreases wait time
- Fast turnaround time delivers results quickly, enabling timely diagnoses

Ease
Ready when you need it, with intuitive operation and low maintenance.
- Intuitive quality assurance protocols and reagent handling for simple operation
- Minimal maintenance schedule for dependable day-to-day operation
- Automated routines and intuitive user interface deliver ease of use

Cost Efficiency
Improved cost efficiency and the opportunity to enhance diagnostic revenue by conducting more chemistry tests in-house.
- Low operating costs, streamlined labor and workflow delivers enhanced cost efficiency
- Customizable panels optimize consumable use
Simple Operation

1. Insert sample.
2. Select tests or panel.
3. Read results.

VETSCAN HM5
Hematology Analyzer
Advanced Hematology Five-Part Differential

The HM5 is a fully-automated, five-part differential hematology analyzer displaying a comprehensive 22-parameter complete blood count (CBC) with cellular histograms on an easy-to-read touch-screen. Its reliable performance, elegant design, ease of use, true database management capability, and minimal maintenance make it the optimal hematology system for veterinary clinics, research laboratories, and pharmaceutical and biotech companies.

Simple Operation

1. Enter information.
2. Insert sample and press Run.
3. Read results.
Reliable Performance for Full CBC Analysis

Flexibility to Analyze the Most Common and Even Uncommon Species
Ideal for veterinary clinics, zoos, barns, and research laboratories, alike.

**Five-part differential for 8 species:** cat, dog, horse, cow, alpaca, llama, rhesus macaque*, cynomolgus macaque*

**Three-part differential for 9 species:** rat, mouse, rabbit, guinea pig, ferret, sheep, goat, pig, primate*

* Primate reference ranges are available for Research Use Only

Histograms to Complement Differentials
Blood cell populations are graphically represented by cellular histograms, so you can easily verify differential cell counts, identify uncommon disease processes, or check sample integrity at a glance.

Capability to Assess Alternative Fluid Samples
Identify nucleated cell counts in alternative fluids including pleural, peritoneal, pericardial, and synovial fluids with the HMS. Characterize exudate samples for diagnosis, and identify potential inflammation, infections, and neoplasia at the point-of-care.

Validated for **synovial fluid in horses**
Validated for **pericardial and peritoneal fluid in dogs**

i-STAT Alinity™
Handheld Analyzer
Proven Technology - Now More Intuitive Than Ever

The i-STAT Alinity v is an advanced, easy-to-use, portable analyzer that delivers real-time, lab-quality results from 2-3 drops of whole blood in 2-3 minutes - making it the ideal solution for critical care situations, emergency hospitals, exotic animals, and research needs at the point-of-care.

Built on the proven technology of the i-STAT®, the i-STAT Alinity v analyzer delivers results for blood gases, electrolytes, chemistries and hematology. It provides important information needed to monitor and evaluate chronic disease and pre-anesthetic patients and provide diagnostic specialty testing information for ill patients.

Simple Operation

1. Fill cartridge to fill line.
2. Insert cartridge.
3. Read results on screen in 2-3 minutes.
i-STAT Alinity v Cartridge Test Menu

The i-STAT Alinity v uses a wide range of disposable, single-use cartridges that contain the necessary reagents to provide reference lab quality results, while improving efficiency throughout the animal health continuum of care.

URINALYSIS
VETSCAN SA
Sediment Analyzer

VETSCAN UA
Urine Analyzer
The Future of Urinalysis is Here

The SA enables practitioners to perform urine microscopy with consistent and efficient high quality images at the point of care. Combined with the UA for urine chemistry testing including microalbumin and urine protein:creatinine ratio, it’s the complete solution for your in-clinic urinalysis needs.

Improve laboratory workflow and automate urinalysis testing; initiate urine tests on the SA to queue urinalysis on the UA, and see the combined urine chemistry and sediment report in an integrated workstation in minutes.
### 10 Classified Urinary Elements

**Blood Cells**
1. Red Blood Cells
2. White Blood Cells

**Bacteria**
3. Bacteria Rods
4. Bacteria Cocci

**Epithelial Cells**
5. Squamous Epithelial Cells
6. Non-squamous Epithelial Cells

**Casts**
7. Hyaline Casts
8. Non-hyaline Casts

**Crystals**
9. Calcium Oxalate Crystals
10. Struvite Crystals

### 14 Analytes in 60 Seconds

- Specific Gravity
- pH
- Blood
- Ascorbic Acid
- Microalbumin
- Calcium
- Creatinine
- Urine Protein:Creatinine Ratio (UPC)

[UA14 strip only]
Comprehensive Urine Chemistry and Sediment Testing

Save Time - Triage Your Testing
Easily identify normal samples that don’t need further action. Images can be viewed in just a few minutes, versus the manual method that requires waiting for centrifugation and a skilled technician, yet only provides qualitative results. The SA saves you time by ruling out what doesn’t need further analysis, so you can focus on more critical patients.

Crisp, Clear Sediment Images
Up to 96 images are included with every sample run, with 6 images automatically curated for your review. Or pick and choose which images to highlight – they’re all saved to the database in one click.

Optimize Sample Quality and Accuracy of Results
Centrifuged samples can destroy cellularity, casts, or crystals. The SA does not centrifuge samples, thus preserving sample quality and enabling the best possible images. In addition, the automated evaluation of the UA strip prevents the under or overdevelopment and subjectivity of evaluating the color change of pads.
Simple Operation

The integrated workflow reduces the variability that comes with manual urine chemistry and sediment evaluation. With the SA and UA complete urinalysis system, you can conduct an assessment of the patients urinary condition in minutes, in only a few simple steps.

1. Enter information on the SA and select Run.

2a. On the SA, hold sample tube below the sample probe and press the Start paddle.

2b. On the UA, press the test tube icon to start your test.
   - Add sample to test strip.
   - Place test strip on strip tray.

3. Read results.
## Additional Features and Benefits

SPECIALTY
VETSCAN VSpro
Specialty Analyzer
On-Site Specialty Analyzer

The VSpro is a specialty analyzer that offers coagulation and fibrinogen testing. Delivering accuracy from a small sample size, with an amazingly simple and intuitive user interface, the VSpro is ideal for veterinary practices, research laboratories, and pharmaceutical and biotechnology companies.
Pre-surgical Coagulation Testing & Critical Care

The VSpro offers a combination assay (PT and aPTT) for canine and feline coagulation testing.

Precise, accurate PT and aPTT results from 1-2 drops of citrated whole blood in minutes prior to surgery. The VSpro also assists in the diagnosis and evaluation of bleeding disorders, toxicity/poisoning, evaluation of disseminated intravascular coagulation (DIC), hepatic disease and monitoring therapy and progression of disease states.

Fibrinogen Testing*

The VSpro delivers lab-quality results in your office or barn-side.

Rapid, automated fibrinogen testing without the hassles, delays, and costs associated with the “old manual protocol” of testing or using commercial lab services.

*Validated for equine only

Simple Operation

1. Insert cartridge and enter patient information.
2. Add sample to cartridge.
3. Read results.

*Mobile device must be connected to internet to email results.

The Future of Veterinary Medicine... Today.

The VUE can be operated from an iOS or Android mobile device. Simply download the app, connect to the VUE, perform a test, and share the result.

It’s that easy.
A Veterinary Technician’s Best Friend

With your clinic’s demanding schedule and workload, it’s becoming more important to have lab devices that make everyone’s job easier. The VUE’s integrated timer and autoread functions do just that.

**Timed Scan**

Timed Scan Mode lets the VUE do the work for you. Simply perform your test, insert it into the cassette holder, and let your VUE’s integrated timer and auto interpretation take over. In 10 minutes, you’ll be notified with your results on your mobile device.

**Quick Scan**

For multiple tests on a single patient, use the Quick Scan Mode to scan additional tests in seconds without re-entering patient information multiple times. Quick Scan Mode works well when using the entire VETSCAN Rapid Test menu and with busy practice workflows.

### Simple Operation

- **App-based platform**
  - Operate the VUE right from an iOS or Android mobile device

- **Automated test interpretation**
  - Get accurate, reproducible results consistent with visual reads, without operator subjectivity

- **Integrated timer**
  - The Rapid Test is scanned for a result on time, every time, ensuring a read time is never missed

- **Flexible**
  - Use all single, combo, or multiplex VETSCAN Rapid Tests in two different scan modes to meet the needs of practice workflow

- **Connectivity**
  - Email results to the pet owner or your practice workstation with any Wi-Fi access point*

*Mobile device must be connected to internet to email results

VETSCAN HDmicroscope
Advanced Digital Imaging Solution
More Than Just a Microscope

The HDmicroscope is a true multi-mode microscope. This dynamic system can be used for multiple tasks in your clinic, including:

• A lab bench microscope to read all slides
• A consulting and revenue generating imaging system to use for client consultations
• A digital capture system to document microscopy images and import to patient files
• A real-time imaging system allowing you to have pathology consults and second opinions
HD Microscopy Camera & Monitor System
Produce Beautiful Images

LED technology helps view and capture the most vibrant HD quality images.

Reliable Performance & Color
Built upon decades of microscopy and digital imaging experience, the HDmicroscope incorporates dual FPGA processors and unique algorithms that produce perfect color reproduction. The innovative technology of the HD camera offers Full 1080p 60fps video preview for HD output without any lag time or compression.

Fluorescence Imaging
The ultra-high signal-to-noise ratio sensor allows the user to set exposure time from 1ms to up to 10 seconds and adjust 20 scales of gain value. And the incredibly efficient 3D noise reduction performance delivers detailed low light images making the HDmicroscope the optimal choice for fluorescence applications.

All-In-One Solution Perfect For Single Use, Teaching, or Group Presentations

Built-in Mouse Control Software for HDMI Viewing & Recording Without a Computer
The advanced design of the camera and monitor system features software inside the camera and an external HDMI port allowing users to connect directly to an HD monitor for live/real time viewing. It can also capture and save the images to an SD card without being connected to a computer. Additionally, this on-board software enables the user to control the camera with a click of the mouse rather than search for buttons on the camera, making the HDmicroscope the ideal choice for teaching, group presentations, or when a computer set-up is simply not an option.

HDMI - 60fps / USB 2.0 - 30fps:
With 60fps HDMI and 30fps USB 2.0 data Transfer at 1920x1080 resolution, the Excelis HD camera is one of the fastest HD 1080p cameras on the market today!

VETSCAN FUSE
The connection between practice and patient
Create a truly revolutionary connection between you, your VETSCAN Diagnostic Laboratory, and your patients.

FUSE empowers you to have more meaningful conversations with pet owners and builds the value of diagnostics by sharing dramatically enhanced test results on a variety of devices in your practice and beyond.

Presentation is Everything

Ask your practice management vendor if they are FUSE Enabled.

Downloadable PDF results in your inbox.
Seamless integration with your practice management software.

**BI-DIRECTIONAL INTEGRATION**

**FUZE WORKFLOW**

1. **Practice Management Software**
   - Order test in your Practice Management Software.

2. **VETSCAN Analyzer**
   - Select the patient from the automated worklist, load and run the sample.

**Simple 2 step workflow**

- True back and forth communication.
  - Results are automatically received and matched with the order in the Practice Management Software.
  - Simple workflow. No missed charges.
